This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Fidelity Asia Fund

### a sub-fund of Fidelity Investment Funds

Y Accumulation Shares (ISIN: GB00B40W2295)

This fund is managed by FIL Investment Services (UK) Limited

### Objectives and Investment Policy

- Aims to provide long-term capital growth.
- Invests in shares of companies throughout the Pacific Basin, but excluding Japan. The portfolio is likely to have a bias towards larger companies.
- Can use derivatives with the aim of risk or cost reduction or to generate additional capital or income in line with the fund's risk profile.
- The fund has discretion in its choices of investments within its objectives and policies.
- Income is accumulated in the share price.
- Shares can usually be bought and sold each business day of the fund.
- This fund may not be appropriate for investors who plan to sell their shares in the fund within 5 years. Investment in the fund should be regarded as a long-term investment.

### Risk and Reward Profile

- The risk category was calculated using historical performance data.
- The risk category may not be a reliable indication of the future risk profile of the fund, is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging may be used to mitigate the effect of this but may not always be successful. Hedging also has the effect of limiting the potential for currency gains to be made.
- The use of financial derivative instruments may result in increased gains or losses within the fund.
- Liquidity is a measure of how easily an investment can be converted into cash. Under certain market conditions assets may be more difficult to sell.
- Emerging markets may be more volatile and it could be harder to sell or trade securities. There may be less supervision, regulation and less well-defined procedures than in more developed countries. Emerging markets can be sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses.

## Charges for this fund (ISIN: GB00B40W2295)

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge N/A

Exit charge N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

Ongoing charges 1.19%

### Charges taken from the fund under certain specific conditions

Performance fee N/A

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor. The ongoing charges figure is based on expenses for the year ending 28/02/2018. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, including the possibility that swing pricing may apply, please consult the most recent Prospectus.

## Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 13/10/1984. This class was launched on 05/10/2009. Past performance has been calculated in GBP.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an '\*' in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Investment Objective section shall refer to a benchmark and information on previous benchmarks may be found in the Annual Report and Accounts.

## Fidelity Strategic Bond Fund

### a sub-fund of Fidelity Investment Funds

Y Accumulation Shares (ISIN: GB00BCRWZS59)

This fund is managed by FIL Investment Services (UK) Limited

### Objectives and Investment Policy

- Aims to provide relatively high income with the possibility of capital growth.
- Obtains exposure primarily to sterling denominated (or hedged back to sterling) bonds.
- Can invest in relation to bonds issued by governments, companies and other bodies.
- The fund may make use of derivatives which are consistent with achieving the fund's objective. This may result in "leverage" by which we mean a level of exposure which could expose the fund to the potential of greater gains or losses than would otherwise be the case.
- The fund has discretion in its choices of investments within its objectives and policies.
- Income is accumulated in the share price.
- Shares can usually be bought and sold each business day of the fund.
- This fund may not be appropriate for investors who plan to sell their shares in the fund within 5 years. Investment in the fund should be regarded as a long-term investment.

### Risk and Reward Profile

- The risk category was calculated using historical performance data.
- The risk category may not be a reliable indication of the future risk profile of the fund, is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging may be used to minimise the effect of this but may not always be successful.
- The use of financial derivative instruments may result in increased gains or losses within the fund.
- There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. While we seek to mitigate this, the fund may be exposed to the risk of financial loss if it invests into an instrument issued by an entity that subsequently defaults on its borrowings. Losses may also be realised if an entity that the fund is exposed to ceases to make interest payments over a period of time or indefinitely. Bond prices have an inverse relationship with interest rates such that when interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall.
- The fund may be exposed to the risk of financial loss if a counterparty used for derivative instruments subsequently defaults.

## American Index Fund

Accumulation C GB00B80QG615

A sub-fund of **HSBC Index Tracker Investment Funds**, an open ended investment company ("OEIC"), managed by HSBC Global Asset Management (UK) Limited.

### Objectives and investment policy

- ▶ To provide long term capital growth by matching the return of the S&P 500 Index.
- ▶ The Index is made up of the 500 largest stock market listed companies in the United States of America, as defined by the Index Provider.
- ▶ The strategy is to use a replication approach to track the S&P's 500 Index. This means that the fund will seek to invest in all of the companies that make up the index and in the same or very similar proportions in which they are included in the index.
- ▶ From time to time, the fund's investment composition may differ from the index in order to manage the fund's transaction costs, to maintain the fund's characteristics during different market environments and differing levels of asset availability or where there are investment restrictions due to regulations or the ACD's cluster munitions and controversial weapons policy.
- ▶ The fund may invest in financial derivative instruments for efficient portfolio management with a level of risk that is consistent with the overall risk profile of the fund. In particular, exchange traded futures maybe used, with the aim of generating returns that are consistent with the index in respect of dividends and cash flowing into the fund.
- ▶ The fund may hold cash and collective investment schemes, including collective investment schemes managed or operated by the ACD or an associate of the ACD, to manage day-to-day cash flow requirements.
- ▶ Income is rolled up into the value of your investment.
- ▶ You may sell your investment on any business day by contacting the administrator before the dealing deadline at 12pm.
- ▶ Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within a period of at least 5 years.

### Risk and reward profile

#### More about this rating

The rating is based on price volatility over the last five years, and is an indicator of absolute risk. Historical data may not be a reliable indication for the future. The value of an investment, and any income from it, may fall as well as rise, and you may not get back the amount you originally invested. The rating is not guaranteed to remain unchanged and the categorisation may shift over time. The lowest rating does not mean a risk-free investment.

#### Why is this fund in category 5?

Equity prices tend to fluctuate more than other asset classes as investors directly participate in underlying companies and their earnings.

#### Material risks not adequately captured by the risk rating above

- ▶ **Exchange rate risk** Investing in assets denominated in a currency other than that of the investor's own currency perspective exposes the value of the investment to exchange rate fluctuations.
- ▶ **Derivative risk** The value of derivative contracts is dependent upon the performance of an underlying asset. A small movement in the value of the underlying can cause a large movement in the value of the derivative. Unlike exchange traded derivatives, over-the-counter (OTC) derivatives have credit risk associated with the counterparty or institution facilitating the trade.
- ▶ **Index Tracking risk** The performance of the Fund may not match the performance of the index it tracks because of fees and expenses, market opening times and regulatory constraints.
- ▶ **Operational risk** The main risks are related to systems and process failures. Investment processes are overseen by independent risk functions which are subject to independent audit and supervised by regulators.

## Charges for this fund

The charges you pay are used to pay the running costs of the fund, including the marketing and distribution costs. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest	
Entry charge	0.00%
Exit charge	0.00%
Charges taken from the fund over a year	
Ongoing charge	0.06%
Charges taken from the fund under certain specific conditions	
Performance fee	None

The Entry and Exit charges shown are the maximum that may be charged. In some cases you may pay less. You can obtain the actual charges from your financial adviser.

A switching fee may be applied up to the amount of the entry charge shown if you switch your shares into this share class of this Fund.

The ongoing charges figure is based on last year's expenses for the year ending 15/11/2017. Charges may vary from year to year.

The ongoing charges figure above does not include portfolio transaction costs (the cost of buying and selling the underlying assets in the Fund). Further information on Charges can be found in the Fees and Expenses section of the full Prospectus.

## Past performance

Warning: the performance returns before the change to charges on 16/11/2015 were achieved under circumstances that no longer apply.

Past performance is not a guide to future performance; the value of your investment and any income from it can go down as well as up. The past performance of this share class is calculated in GBP.

Performance returns are based on the net asset value with distributable income reinvested. Past performance takes account of all ongoing charges, but not entry and exit charges.

The fund was launched on 31/10/1988.

The investment benchmark for the fund is the S&P 500 Gross.

Performance returns prior to the first share class price date of 03/09/2012 have been simulated using the track record of an older share class.

# Investec UK Alpha Fund

A sub-fund of Investec Funds Series i  
Managed by Investec Fund Managers Limited

Class I Accumulation shares in sterling  
ISIN: GB00B7LM4J06

### Objectives and investment policy

The Fund aims to provide long-term capital growth and income.

The Fund invests primarily in the shares of UK companies focussing on shares believed to offer above average opportunities for total returns (the combination of income and capital growth).

The Fund may invest in other assets such as cash, other funds and derivatives (financial contracts whose value is linked to the price of an underlying asset).

The Investment Manager is free to choose how the Fund is invested and does not manage it with reference to an index.

Any income due from your investment is reflected in the value of your shares rather than being paid out.

You can buy or sell shares in the Fund on any business day in the UK, as defined in the Investec Funds Series omnibus prospectus (section 3).

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

### Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the middle of the Risk and Reward Indicator scale. This is because it invests in the shares of companies, whose values tend to fluctuate more widely.

#### Risks that may not be fully captured by the Risk and Reward Indicator:

**Equity investment:** The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

**Geographic / Sector:** Investments may be primarily concentrated in specific countries, geographical regions and/or industry sectors. This may mean that the resulting value may decrease whilst portfolios more broadly invested might grow.

The full list of the Fund's risks are contained in the appendices of the Investec Funds Series omnibus prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure shown here is an estimate of the charges. The Fund's annual report for each financial year will include detail on the exact charges made. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see section 7 of the Investec Funds Series omnibus prospectus.

### One-off charges taken before or after you invest

Entry charge 0%

Exit charge None

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the fund over a year

Ongoing charge 0.83%

### Charges taken from the fund under certain specific conditions

Performance fee None

The Fund is a sub-fund of Investec Funds Series i. You may switch between other Investec Funds Series i, ii, iii or iv sub-funds or share classes of the same sub-fund at no extra charge (unless the other share class has a higher entry charge, in which case the difference may be payable). Details on switching are contained in section 3 of the Investec Funds Series omnibus prospectus. The assets of the Fund are ring-fenced and cannot be used to pay the debts of other Investec sub-funds in the same Investec Fund Series.

Investec Fund Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Investec Funds Series omnibus prospectus.

## Past performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in sterling.

The Fund was launched on 5 February 1979 and this share class on 2 May 2012.

(1): Performance has been simulated for this period based on a longer established share class

(2): Due to an investment policy change on 07 April 2017, performance was achieved under different circumstances

**iShares Corporate Bond Index Fund (UK)**

A sub-fund of BlackRock Collective Investment Funds

**Class D Accumulating GBP**

ISIN: GB00B84DSW83

Manager: BlackRock Fund Managers Limited

**Objectives and Investment Policy**

- ▶ The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund’s assets, by tracking closely the performance of the Markit iBoxx GBP Non-Gilts Overall TR Index, the Fund’s benchmark index.
- ▶ The Fund invests in fixed income securities (such as bonds) that make up the benchmark index and, at the time of purchase, comply with the credit rating requirements of the benchmark index.
- ▶ The benchmark index measures the performance of fixed income securities denominated in Sterling issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) but excludes gilts (i.e. bonds) issued by the UK government. These may include fixed income securities which pay income according to a fixed rate of interest and will be investment grade (i.e. meet a specified level of credit worthiness) at the time of inclusion in the benchmark index.
- ▶ The Fund uses techniques to achieve a similar return to its benchmark index. These techniques may include the strategic selection of certain securities that make up the benchmark index or other fixed income securities which provide similar performance to certain constituent securities. They may also include the use of derivatives (i.e. investments the prices of which are based on one or more underlying assets).
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund’s base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £100,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund’s prospectus, available on the product pages at [www.blackrock.com](http://www.blackrock.com)

**Risk and Reward Profile**

- ▶ This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated three due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund’s investments or expose the Fund to losses.

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due. If a financial institution is unable to meet its financial obligations, its financial assets may be subject to a write down in value or converted (i.e. “bail-in”) by relevant authorities to rescue the institution.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

\*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 24 March 2018. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	None
Exit Charge	None*
This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.	
Charges taken from the Fund over each year	
Ongoing Charges	0.16%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

## Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2010. The unit class was launched in 2012.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

† Benchmark: iBoxx Sterling Non Gilt 1300CET Index (GBP)

Historic performance to 31 December 2017

As of 29 April 2016, the benchmark index converted from a close of business valuation to a midday valuation. Historic performance of the benchmark index has been simulated by the benchmark index provider and such data is used for the purposes of demonstrating historic performance in the "Past Performance" table from 30 June 2010 or from the launch of the share class if later.

## Jupiter European Special Situations Fund I-Class

I-Class Accumulation Units, ISIN: GB00B60WTT90, (also representative of I-Class Income Units, ISIN: GB00BQ1KNZ69 at launch date 25/09/2014). The Manager is Jupiter Unit Trust Managers Limited.

### Objectives and investment policy

The Fund objective is to grow the money invested in the Fund over the long-term. The Fund will principally invest in the shares of companies listed on a European stock market. The Fund Manager will only invest in companies that they believe to be available at a lower price than they should be valued at.

The Fund Manager is able to make their own investment decisions and is not constrained by any sector limits or guided by any particular benchmark.

If you select I-Class Accumulation Units any income payable by the Fund will be automatically reinvested and reflected in the price of the units. If you select I-Class Income Units any income payable by the Fund will be distributed to investors on a regular basis.

Investors are able to buy and sell units during any business day between 9am and 5.30pm. If you tell us to buy or sell units before 12pm on any business day we will make the transaction on the same day. If you tell us to buy or sell units after 12pm we will make the transaction on the following business day.

### Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- The lowest category does not mean 'no risk'.
- The Fund is in this category due to the nature of its investments and previous levels of volatility (how much the value of the Fund rises and falls).
- Market and exchange rate movements can cause the value of an investment to fall as well as rise, and you may get back less than originally invested.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment.

### Charges taken from the Fund over a year

Ongoing charges	1.02%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	NONE
-----------------	------

- The ongoing charges figure is based on the last year's expenses and may vary from year to year. It excludes the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).
- The ongoing charges figure quoted in this document is based on fees and expenses for the annualised period to 31/07/2017.
- Further information about charges is available in sections 18 and 19 of the Scheme Particulars which are available from Jupiter on request.

## Legal & General Global Inflation Linked Bond Index Fund (the "Fund") Class I Accumulation ISIN: GB00BBHXNN27

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

### OBJECTIVE AND INVESTMENT POLICY

#### Objective

The objective of this Fund is to provide a mixture of income and growth (if the income is reinvested) by tracking the performance of the Bloomberg Barclays World Government Ex UK Inflation Linked Bonds TR Hedged GBP Index.

#### Investment policy:

- The Fund will invest predominantly in bonds (a type of loan which pays interest) included in the Index. These bonds will have a pre-set rate of income (either set at a fixed level or varying in a predetermined way).
- The Fund's investments will closely match those that make up the Index and this will be achieved through investing in a sample selection of the bonds in the Index. The bonds are issued in the relevant national currency by governments around the world (excluding the UK). The interest and capital returns on these bonds will be linked to local inflation rates.
- The bonds that the Fund invests in will be a mixture of investment grade bonds (rated as lower risk) and sub-investment grade bonds (rated as higher risk). The mix will closely match that of the Index. Investment and sub-investment grade bonds are bonds that have been given a credit rating by a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
- 35% or more of the Fund can be invested in United States government or public bonds.
- The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
  - reduce risk or cost; or

- generate additional capital or income with no, or an acceptably low, level of risk.

- It will also use currency derivatives for investment purposes to manage the effect of fluctuations in exchange rates with sterling, in order to maintain accurate tracking.
- The Fund may also invest in other bonds, deposits, money market instruments and cash.

#### Other information:

- If you hold accumulation units, income from investments held by the Fund (interest) will be reinvested into the value of your units.
- You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 3.00pm. This is the time we calculate unit prices for this Fund. If you contact us after 3.00pm, the units will be bought or sold at the next business day's price.
- The Fund's base currency is denominated in sterling (British pounds).
- This Fund is designed for investors looking for income and growth from an investment in global inflation linked bonds (a type of loan which pays interest) excluding those issued by the UK government.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

### RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This risk and reward indicator is based on historical data which may not be a reliable indication of the Fund's risk and reward category in the future.
  - The category number highlighted above reflects the rate at which the Fund's unit price has moved up and down in the past. If the Fund has less than 5 years' track record, the number also reflects the rate at which the index the Fund tracks has moved up and down in the past. Higher numbers mean the potential reward could be greater, but this comes with increased risk of losing money.
  - The Fund is in category 3 because it invests in company or government bonds which are sensitive to changes in interest rates, inflation and credit. This can be driven by political and economic changes and other significant events and may cause the value to go up and down. Bonds that are closer to their maturity date tend to be more stable in value. Bonds are generally considered to be higher risk investments than cash, but lower risk than company shares.
  - The Fund's category is not guaranteed to remain the same and may change over time.
  - Even a fund in the lowest category is not a risk free investment.
  - The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
  - Further information on the risks of investing in this fund is contained in the Prospectus available at [www.legalandgeneral.com/reports](http://www.legalandgeneral.com/reports).
- The risk and reward indicator may not take account of the following risks of investing in the Fund:
- This Fund holds bonds that, rather than being traded on an exchange, are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments that are traded on an exchange and on any particular day there may not be a

buyer or a seller for the bonds. In times of market uncertainty or if an exceptional amount of withdrawals are requested it may become less easy for your Fund to sell investments and the Manager may defer withdrawals, or suspend dealing. The Manager can only delay paying out if it is in the interests of all investors and with the permission of the Fund trustee or depositary.

- Investment returns on bonds are sensitive to trends in interest rate movements. Their values are likely to fall when interest rates rise. Such falls may be more pronounced in a low interest rate environment. Bonds with a short time to go before their maturity date will fall by less than bonds with a longer time to their maturity date.
- This Fund invests in inflation-linked bonds, which are particularly sensitive to changes in inflation rates. Their values are likely to fall when inflation rates fall.
- The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of your Fund may fall.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- There may be differences in performance between the Fund's assets and the derivatives used to manage the fluctuation of exchange rates with sterling. This could result at times in the Fund being over protected or under protected against these fluctuations.
- The Fund may have underlying investments that are valued in currencies that are different from sterling (British Pounds). Any such investments will be impacted by exchange rate fluctuations and this may affect the value of your investment and any income from it. Currency hedging techniques may be applied to reduce the impact of exchange rate fluctuations but may not entirely eliminate it.

## CHARGES FOR THIS FUND

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
<b>Entry charge</b>	0.00%*
<b>Exit charge</b>	0.00%*
This is the maximum that might be taken out of your money before it is invested.	
*The Fund also incurs a unit price spread. See opposite.	
Charges taken from the fund over a year	
<b>Ongoing charges</b>	0.27%
Charges taken from the fund under certain specific conditions	
<b>Performance fee</b>	None

- There are no entry or exit charges for this Fund.
- The ongoing charges figure is based on the latest available expenses at December 2017. This figure may change in the future.
- This Fund's ongoing charges include any charges made by any other funds it may invest in. They exclude portfolio transaction costs.
- The ongoing charges are taken from the income of the Fund.

### Other costs:

- **Unit price spread:** each day there are two prices for this Fund: a higher price you pay to buy units and a lower price you receive when you sell units. The Fund manager calculates these prices. The difference between these prices is called the 'spread'. The spread is separate to the ongoing charges shown in this section. This Fund's spread reflects the difference between the buying and selling prices of the assets it holds and costs associated with buying and selling the assets. The spread can change at any time and by any amount. As an example, the buying price for units in this Fund was 0.08% higher than the selling price at 31 December 2017.
- For more information about charges and costs, please see the charges and expenses section in the Fund's Prospectus, or visit our website at [legalandgeneral.com/chargesandfees](http://legalandgeneral.com/chargesandfees).

## PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the Fund take into account the ongoing charges and assume income (after any tax) is reinvested. The figures do not take account of any bid-offer spread or dilution levy or any transaction costs.
- The performance has been calculated in sterling (British pounds).
- The Fund will not replicate the performance of its benchmark index perfectly. This is because the Fund will incur drags on performance such as expenses, tax and transactions costs, which the benchmark index is not subject to.
- The annual return is for a 12 month period ending 31 December.
- The Fund launched in 2013.
- This unit class launched in 2013.

## Legal & General UK 100 Index Trust (the "Fund") Class I Accumulation ISIN: GB00B0CNH502

The authorised fund manager of the Fund is Legal & General (Unit Trust Managers) Limited.

## OBJECTIVE AND INVESTMENT POLICY

### Objective

The objective of this Fund is to provide growth by tracking the performance of the FTSE 100 Index.

### Investment policy:

- The Fund will invest almost entirely in company shares. The Fund's investments will closely match those that make up the Index. The Index consists of shares of the 100 largest companies listed on the UK stock market.
- The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
  - reduce risk or cost; or
  - generate additional capital or income with no, or an acceptably low, level of risk.

### Other information:

- If you hold accumulation units, income from investments held by the Fund (dividends) will be reinvested into the value of your units.
- You can buy or sell units in this Fund on any business day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this Fund. If you contact us after 12 noon, the units will be bought or sold at the next business day's price.
- The Fund's base currency is denominated in sterling (British pounds).
- This Fund is designed for investors looking for growth from an investment in UK company shares.
- Although investors can take their money out at any time, this Fund may not be appropriate for those who plan to withdraw their money within five years.
- This Fund is not designed for investors who cannot afford more than a minimal loss of their investment.
- If you do not understand this document we recommend you seek additional information to help you decide if this Fund is right for you.

## RISK AND REWARD PROFILE

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This risk and reward indicator is based on historical data which may not be a reliable indication of the Fund's risk and reward category in the future.
- The category number highlighted above reflects the rate at which the Fund's unit price has moved up and down in the past. If the Fund has less than 5 years' track record, the number also reflects the rate at which the index the Fund tracks has moved up and down in the past. Higher numbers mean the potential reward could be greater, but this comes with increased risk of losing money.
- The Fund is in category 5 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
- The Fund's category is not guaranteed to remain the same and may change over time.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- Further information on the risks of investing in this fund is contained in the Prospectus available at [www.legalandgeneral.com/reports](http://www.legalandgeneral.com/reports).

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.

### Other costs:

- **Unit price spread:** on any day, the prices for buying or selling units in this Fund are the same. However, there are maximum and minimum prices we can charge for units, reflecting the difference between the buying and selling prices of the assets in the Fund and costs associated with buying and selling the assets. From day to day we will set the unit price between the maximum and minimum depending on whether money is coming into or leaving the Fund. The difference between the maximum and minimum price, which is the most the price can change, can vary but as an example, the maximum price for units in this Fund was 0.52% higher than the minimum price at 31 December 2017.

## Key Investor Information Document

The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it to help you make an informed decision about whether to invest.

### Lazard Emerging Markets Fund A Acc GBP

Lazard Emerging Markets Fund is a sub-fund of Lazard Investment Funds (the "UCITS")

#### Objectives and Investment Policy

Lazard Emerging Markets Fund (the "Fund") aims for long-term capital growth. The Fund invests in shares of companies in or having significant business in emerging markets concentrating on but not limited to Latin America, the Pacific Basin and Europe.

The Fund may use derivatives (which are financial contracts whose value is linked to the price of an underlying investment), for the purposes of efficient portfolio management.

You can buy or sell shares in the Fund on any day on which the stock exchange in London is open for business.

The Fund has discretion as to which investments it will hold within the limits of the investment objective and policy.

Income and profits, if any, attributable to your shares will not be paid out as a dividend, but will be accumulated in the Fund on your behalf and reflected in an increase in the value of your shares.

The Fund's performance is measured against the performance of the MSCI Emerging Markets Index (the "Benchmark"). However, the Fund has flexibility to invest in securities and asset classes not included in the Benchmark.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within the short term.

#### Risk and Reward Profile

The risk and reward categories above are calculated using historic data and may not be a reliable indicator of the Fund's future risk profile. The risk and reward category may shift over time and is not a target or guarantee. The lowest category (i.e. category 1) does not mean "risk free".

The risk rating of this Share Class is calculated on the basis of historic volatility i.e. how much the value of the underlying assets of the Fund have fluctuated over the past 5 years.

This Share Class has been placed in the risk category stated above, because based on the historic data, the underlying assets within the Fund have shown high volatility.

Please note, there are other risks that may not be reflected in the risk and reward categories above. Some of these risks are summarised below.

- There is no capital guarantee or protection of the value of the Fund. The value of your investment and the income from it can go down as well as up and you may not get back the amount you invested.
  - The Fund invests in shares, whose values tend to have higher price fluctuations than some other types of investments.
  - The returns from your investment may be affected by changes in the exchange rate between the Fund's base currency, the currency of the Fund's investments, your share class and your home currency.
  - This Fund may invest in the securities of emerging markets. These markets may be less developed than others and so there is a greater risk that the Fund may experience greater volatility, delays in buying, selling and claiming ownership of its investments. Emerging markets may also have less developed political, economic and legal systems and there is a higher risk that the Fund may not get back its money.
- See "Risk Factors" in the UCITS' prospectus for more information about risks.

# Lazard Emerging Markets Fund A Acc GBP

Lazard Emerging Markets Fund is a sub-fund of Lazard Investment Funds (the "UCITS")

## Charges

The charges you pay are used to pay the costs of running the Fund, including marketing and distributing costs. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

<b>Entry charge</b>	3.00%
<b>Exit charge</b>	N/A

This is the maximum that might be taken out of your money before it is invested and before proceeds of your investment are paid out.

Charges taken from the Fund over a year

<b>Ongoing charges</b>	1.08%
------------------------	-------

Charges taken from the Fund under certain specific conditions

<b>Performance fee</b>	N/A
------------------------	-----

The entry and exit charges shown are maximum figures. In some cases you may pay less. You can find out the actual charges from your financial advisor.

The ongoing charges figure is based on expenses for the year ending 31 December 2017 and does not include any portfolio transaction costs incurred where we buy or sell assets for the Fund. Ongoing charges may vary from year to year.

In the case of a large purchase or sale of shares in the Fund a "dilution levy", as described in the UCITS' prospectus, may be applied where the Authorised Corporate Director believes it is in the best interests of the other shareholders. Please see "Fees and Expenses" and "Price per Share in each Sub-Fund and each Class" in the UCITS' prospectus.

You may switch shares of a sub-fund for shares of another sub-fund. A fee may be charged on switching between sub-funds. The fee will not exceed an amount equal to the then prevailing initial charge for the class into which shares are being switched. See "Switching" in the UCITS' prospectus.

## Past Performance

### The Fund was established on: 06/09/1999

Past performance is calculated in GBP. The Share Class seed date was: 01/10/2007.

Past performance is not a reliable guide to future performance.

The past performance shown in the chart takes account of all charges except, where applicable, the Fund's entry and exit charge.

The MSCI data may not be further redistributed or used as a basis for other indices or any securities or financial products. This document is not approved, reviewed or produced by MSCI.

## Practical Information

The UCITS' depositary is The Bank of New York Mellon (International) Limited. The Fund is one of a number of sub-funds of the UCITS. Each sub-fund has its own specific portfolio of assets and its own liabilities. A creditor may look to all the assets of all the sub-funds of the UCITS for payment, regardless of which sub-fund owes money to the creditor. See "Company Structure" in the UCITS' prospectus for further information.

Further information about the Fund may be obtained from the UCITS' prospectus and annual and half-yearly Report and Accounts, all of which are prepared for the UCITS as a whole and which are available free of charge in English from Lazard Asset Management Limited, 50 Stratton Street, London W1J 8LL or in English at [www.lazardassetmanagement.com](http://www.lazardassetmanagement.com).

The Fund is subject to the tax legislation of the UK. This may have an impact on your personal tax position.

The latest share price is published at [www.lazardassetmanagement.com](http://www.lazardassetmanagement.com).

Details of Lazard Fund Managers Limited's Remuneration Policy, including a description of how remuneration and benefits are calculated and the identities of the persons responsible for awarding such remuneration/benefits, can be accessed from [www.lazardassetmanagement.com](http://www.lazardassetmanagement.com). A paper copy of these policy details is also available free of charge from Lazard Fund Managers Limited upon request.

Lazard Fund Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the UCITS' prospectus.

# Legg Mason Brandywine Global Fixed Income Fund

Class X GBP Accumulating

ISIN: IE00BSZLQJ44

**A sub-fund of:** Legg Mason Global Funds plc.

## Objectives and Investment Policy

### Objective

The fund's goal is to achieve income and growth of the fund's value.

### Investment Policy

- The fund invests in bonds issued by various governments.
- The fund only buys bonds that are highly rated at the time of purchase.
- The fund may invest in bonds issued in various currencies.
- The fund may invest up to 20% in bonds that are not represented in the Citigroup World Government Bond Index but are still highly rated at the time of purchase.
- The fund may invest in derivatives (financial instruments whose value is derived from the value of other assets), to help try to achieve the fund's objective as well as to reduce risk or cost or to generate additional growth or income for the fund.

**Manager's Discretion:** The fund manager has discretion in selecting investments within the fund's objective and investment policies.

**Fund's Base Currency:** US Dollar

**Share Class Currency:** Pound Sterling

**Transaction Costs:** The fund bears costs in buying and selling investments, which may have a material impact on the fund's performance.

**Dealing Frequency:** You can buy, sell and switch your shares on each day that the New York Stock Exchange is open for business.

**Minimum Initial Investment:** For this share class the minimum initial investment is GBP 1,000.

**Treatment of Income:** Income and gains from the fund's investments are not paid but instead are reflected in the fund's share price.

## Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because investments in a diversified portfolio of bonds from various countries and sectors, along with exposure to various currencies, have historically been subject to moderate fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

**Bonds:** There is a risk that issuers of bonds held by the fund may not be able to repay the investment or pay the interest due on it, leading to losses for the fund. Bond values are affected by the market's view of the above risk, and by changes in interest rates and inflation.

**Liquidity:** In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the markets, in which case the fund may not be able to minimise a loss on such investments.

**Concentrated fund:** The fund invests in fewer bonds than other funds which invest in bonds usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual investment performs poorly.

**Fund currency:** Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.

**Interest rates:** Changes in interest rates may negatively affect the value of the fund. Typically as interest rates rise, bond values fall.

**Derivatives:** The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

**Fund counterparties:** The fund may suffer losses if the parties that it trades with cannot meet their financial obligations.

**Fund operations:** The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets.

**Class currency:** The value of your investment may fall due to changes in the exchange rate between the currency of your share class and the base currency of the fund.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.

## Charges

<b>One-off charges taken before or after you invest</b>	
<b>Entry charge</b>	none
<b>Exit charge</b>	none
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
<b>Charges taken from the fund over a year</b>	
<b>Ongoing charge</b>	0.87%
<b>Charges taken from the fund under certain specific conditions</b>	
<b>Performance fee</b>	none

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser about this.

The ongoing charge is based on expenses for the 12 month period ending December 2017. This figure may vary over time.

For more information about charges, please see the "Fees and Expenses" sections of the base prospectus and fund supplement.

## Past Performance

The fund was launched on 1 October 2003 and the share class began issuing shares on 23 December 2014.

Past performance has been calculated in GBP.

The performance reflects all fees and charges payable by the fund but does not reflect any entry or exit charge that might be payable.

Past performance is no guide to future returns and may not be repeated.

## Practical Information

**Depositary:** BNY Mellon Trust Company (Ireland) Limited.

**Further Information:** Additional information about the fund (including the prospectus, supplement, reports and accounts and the remuneration policy) may be obtained in English. The prospectus, supplement, and the reports and accounts are also available in French, German, Greek, Italian, Portuguese and Spanish. The documents are available free of charge upon request to the Administrator: BNY Mellon Fund Services (Ireland) Designated Activity Company, Guild House, Guild Street, International Financial Services Centre, Dublin 1, Ireland and at [www.leggmasonglobal.com](http://www.leggmasonglobal.com).

**Price Publication:** The latest share price is published at [www.leggmason.co.uk/dailyprices](http://www.leggmason.co.uk/dailyprices).

**Tax Legislation:** The fund is subject to the tax law and regulation of Ireland. Depending on your own country of residence, this might have an impact on your investment. For further details, please speak to your financial adviser.

**Liability Statement:** Legg Mason Global Funds plc may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the fund.

**Structure:** Legg Mason Global Funds plc has a number of different sub-funds. The assets and liabilities of each sub-fund are segregated by law from the assets and liabilities of each other sub-fund. The prospectus and the periodic reports are prepared for Legg Mason Global Funds plc as a whole.

**Switching Between Funds:** You may apply for shares in this fund to be exchanged for another class within the same fund or to another class in other funds of Legg Mason Global Funds plc, subject to certain conditions (see "Exchanges of Shares" in the prospectus). The fund itself does not charge a switching fee for the exchange of shares of one fund for the same class of shares of another fund or for shares of a different share class of the same fund. Certain dealers, however, may charge a switching fee – please ask your dealer.

Legg Mason Global Funds plc is authorised in Ireland and regulated by the Central Bank of Ireland. This key investor information is accurate as at 12/02/2018.

## M&G Global Emerging Markets Fund

a sub-fund of M&G Investment Funds (7)

Sterling Class I – Accumulation shares ISIN no. GB00B3FFXX47

Managed by M&G Securities Limited, which is part of the Prudential Group

### Objective and investment policy

The fund aims to provide income and capital growth over five years or more by investing in the shares of companies based in emerging market countries\*.

**Core investment:** At least 70% of the fund is invested in the shares of companies from across the emerging markets, or companies that conduct the majority of their business in such countries.

**Other investments:** Generally, less than 10% is held as cash or assets that can be turned into cash quickly.

**Strategy in brief:** The fund manager focuses on finding companies with the potential to improve their future profitability, or the ability to sustain a high level of profitability over time. Constructing a portfolio of stocks with different profiles of profitability helps build a diversified portfolio with the potential to cope in different market conditions. The fund manager seeks companies whose future profitability is deemed to be undervalued by the market and looks to invest in companies whose corporate governance practices ensure the business is run in the interests of all shareholders.

**Performance measurement:** The fund is actively managed. The MSCI Emerging Markets Index is a point of reference against which the performance of the fund may be measured.

\* Emerging market countries are defined as those included within the MSCI Emerging Markets Index and/or those included in the World Bank's definition of developing economies, as updated from time to time.

#### Other information

The fund manager has the freedom to decide which investments should be held in the fund.

You can buy and sell shares in the fund on any business day. Provided we receive your instructions before 11.30 CET, shares will be bought at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

### Risk and reward profile

• The above risk number is based on the rate at which the value of the fund has moved up and down in the past. It may not be a reliable indicator of the future risk profile of the fund.

- The risk number shown is not guaranteed and may change over time.
- The lowest risk number does not mean risk free.

#### The main risks that could affect performance are set out below:

- The value of investments and the income from them will rise and fall. This will cause the fund price, as well as any income paid by the fund, to fall as well as rise. There is no guarantee the fund will achieve its objective, and you may not get back the amount you originally invested.
- The fund will invest in emerging markets which are generally smaller, more sensitive to economic and political factors, and where investments are less easily bought and sold. In exceptional circumstances, the fund may encounter difficulties when selling or collecting income from these investments, which could cause the fund to incur a loss. In extreme circumstances, it could lead to the temporary suspension of dealing in shares in the fund.
- Changes in currency exchange rates will affect the value of your investment.
- Where market conditions make it hard to sell the fund's investments at a fair price to meet customers' sale requests, we may temporarily suspend dealing in the fund's shares.
- Some transactions the fund makes, such as placing cash on deposit, require the use of other financial institutions (for example, banks). If one of these institutions defaults on their obligations or becomes insolvent, the fund may incur a loss.

A more detailed description of the risk factors that apply to the fund can be found in the fund's Prospectus.

## M&G Recovery Fund

a sub-fund of M&G Investment Funds (3)

Sterling Class I – Accumulation shares ISIN no. GB00B4X1L373

Managed by M&G Securities Limited, which is part of the Prudential Group

### Objective and investment policy

The fund aims to grow capital over five years or more by investing predominantly in the shares of companies that, at the time of investment, are out of favour with the stockmarket, and where the fund manager believes a good management team is making concerted efforts to turn the business around.

**Core investment:** At least 80% of the fund is invested in the shares of companies. Currently these are predominantly UK-listed companies.

**Other investments:** Generally, less than 10% is held as cash or assets that can be turned into cash quickly.

**Strategy in brief:** The fund invests in those businesses whose problems are solvable and temporary rather than structural in nature, and which are expected to move through a recovery cycle. This is a relatively simple investment approach focusing on three key factors: people, strategy and cashflow. Developing a constructive dialogue with company management is fundamental to the investment process. The fund manager takes a long-term view with a typical holding period of five years or more.

**Performance measurement:** The fund is actively managed. The FTSE All-Share Index is a point of reference against which the performance of the fund may be measured.

#### Other information

The fund manager has the freedom to decide which investments should be held in the fund.

You can buy and sell shares in the fund on any business day. Provided we receive your instructions before 12 noon, shares will be bought at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund.

## M&G Strategic Corporate Bond Fund Sterling Class I – Accumulation shares ISIN no. GB00B7J4YT87

Managed by M&G Securities Limited, which is part of the Prudential Group

### Objective and investment policy

The fund aims to provide income and capital growth.

**Core investment:** At least 70% of the fund is invested in investment grade bonds issued by companies from anywhere in the world.

**Other investments:** The fund also invests in bonds issued by governments (usually of developed countries) and high yield bonds. In addition, it may hold cash or assets that can be turned into cash quickly.

**Use of derivatives:** Derivatives may be used to gain exposure to the fund's core and other investments, to reduce risks and costs and to manage the impact of changes in currency exchange rates on the fund's investments.

**Strategy in brief:** The fund manager selects investments based on an assessment of a combination of macroeconomic, asset, sector and stock-level factors. Spreading investments across issuers and industries is an essential element of the fund's strategy and the manager is assisted in the selection of individual bonds by an in-house team of analysts.

#### Glossary terms:

**Bonds:** Loans to governments and companies that pay interest.

**Derivatives:** Financial contracts whose value is derived from other assets.

**High yield bonds:** Bonds issued by companies considered to be riskier and therefore generally paying a higher level of interest.

**Investment grade corporate bonds:** Bonds issued by a company with a medium or high credit rating from a recognised credit rating agency. They are considered to be at lower risk from default than those issued by companies with lower credit ratings.

#### Other information

The fund manager has the freedom to decide which investments should be held in the fund.

You can buy and sell shares in the fund on any business day. Provided we receive your instructions before 12 noon, shares will be bought at that day's price.

Any income from the fund will be rolled up into the value of your investment.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund. These can be higher when investing outside Europe.

- The fund may use derivatives with the aim of profiting from a rise or a fall in the value of an asset (for example, a company's bonds). However, if the asset's value varies in a different manner, the fund may incur a loss.
- When interest rates rise, the value of the fund is likely to fall.
- The value of the fund may fall if the issuer of a fixed income security held is unable to pay income payments or repay its debt (known as a default).
- Where market conditions make it hard to sell the fund's investments at a fair price to meet customers' sale requests, we may temporarily suspend dealing in the fund's shares.
- Some transactions the fund makes, such as placing cash on deposit, require the use of other financial institutions (for example, banks). If one of these institutions defaults on their obligations or becomes insolvent, the fund may incur a loss.

## Man GLG Undervalued Assets Fund Professional Accumulation Shares (Class C)

(ISIN:GB00BFH3NC99) Man GLG Undervalued Assets Fund (the 'Fund') is a sub-fund of Man UK ICVC (the 'Company').

Man Fund Management UK Limited, part of Man Group plc, is the Authorised Corporate Director.

### Objectives and investment policy

- The objective of the Fund is to achieve long term capital growth.
- To achieve the objective the Fund will invest predominantly in securities of UK listed companies, which are considered to be undervalued relative to their asset base and to the returns on capital the companies are generating, either directly or indirectly (through permitted derivatives) including exchange-traded or "over-the-counter" financial derivative instruments such as stock options, equity swaps and contracts for differences.
- The Fund may use financial derivative instruments (instruments whose prices are dependent on one or more underlying asset 'FDI') extensively for investment purposes (including the taking of synthetic short positions) as well as for hedging (the practice of undertaking one investment activity with the aim of protecting against loss in another) or other efficient portfolio management purpose.
- The Fund may also invest in other transferable securities, units or shares in collective investment schemes, money market instruments, deposits, cash, near cash and derivatives and forward transactions.
- The Fund may also hold ancillary liquid assets such as time deposits and may use currency transactions, including forward currency contracts, currency swaps and foreign currencies to alter the exposure characteristics of the transferable securities held by the Fund.
- Income earned on investments will be added to the value of investors' shares. Shares can be bought and sold on each Dealing Day.

### Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 5 as funds of this nature engage in strategies that typically have a moderate to high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

#### The following risks may not be fully captured by the risk and reward profile:

- The use of FDI involves additional risks: (i) FDI may be highly sensitive to price movements of the asset on which they are based; (ii) a counterparty to a non-exchange traded FDI may not meet its payment obligations in the event of default; (iii) the use of FDI may result in increased leverage. These risks may lead to significant losses.
  - Liquidity characteristics of non-exchange listed investments can be irregular, and may result in higher than anticipated costs to liquidate the investment.
  - The Fund is a specialist country-specific fund which, as a result, may carry greater risk than a more internationally diversified portfolio.
  - The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets and therefore the value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.
- A complete description of risks is set out in the prospectus section entitled 'Risk Factors'.

## Charges

The charges you pay are used to pay the costs of running the Fund. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

<b>Entry charge</b>	None
<b>Exit charge</b>	None

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

<b>Ongoing charges</b>	0.90%
------------------------	-------

### Charges taken from the fund under certain specific conditions

<b>Performance fee</b>	None
------------------------	------

The entry and exit charges shown are maximum figures and in some cases you might pay less. Please refer to your financial advisor or the distributor for the actual charges.

The ongoing charges figure is based on expenses for the year ending 28/02/2018.

This figure may vary from year to year. It excludes performance fees (where applicable) and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund.

If you switch between different sub-funds of the Company you may pay a switching charge on your subscription to the new sub-fund. This charge may be an amount equal to the entry charge of the new sub-fund.

For detailed information on charges and fees please see the 'Fees and Expenses' section of the prospectus.

## Past performance

- The Fund was authorised in 2013. This share class was launched on 15 November 2013.
- The past performance chart shows the annual performance, calculated in GBP, for each full calendar year since launch.
- The performance in this table includes all fees and expenses, excluding any entry or exit charges, and shows percentage year-on-year changes in Fund value.
- Please be aware that past performance is not a reliable indicator of, or guide to, future performance.

## Practical information

- The Fund is a sub-fund of the Company which is an umbrella scheme comprising a number of sub-funds.
- BNY Mellon Trust & Depositary (UK) Limited is the depositary of the Company. The Fund's assets are treated as being segregated from the assets of other sub-funds of the Company.
- Additional information related to the Fund is located in the prospectus which is produced in an official language of the jurisdictions in which the Fund is registered for public sale. The prospectus is available together with the most recent financial statements, information on other share classes and the latest prices of shares free of charge at [www.man.com](http://www.man.com).
- The Fund is subject to taxation legislation in the UK, which may have an impact on your personal tax position as an investor in the Fund.
- Man Fund Management UK Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the prospectus for the Fund.
- You may switch shares in the Fund for shares in any other sub-fund of the Company. Further information and provisions are in the prospectus.
- Details of Man Fund Management UK Limited's Remuneration Policy are available at [www.man.com/mfm-remuneration-policy](http://www.man.com/mfm-remuneration-policy), including: (a) a description of how remuneration and benefits are calculated; and (b) the identity of persons responsible for awarding remuneration and benefits. A paper copy of these details may be obtained, free of charge, at Man Fund Management UK Limited at Riverbank House, 2 Swan Lane, London, EC4R 3AD, United Kingdom.

## Royal London UK Government Bond Fund (Income - Class M Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00B7QFPL36  
Managed by Royal London Unit Trust Managers Limited

### Objectives and investment policy

**Objective** The investment objective of the Fund is to maximise total investment return (income and capital growth) over the medium (5 years) to long (7 years) term.

**Policy** The Fund invests mainly in bonds issued or backed by the UK government. The Fund may also invest in bonds issued by companies that are of the highest credit quality. The Fund may use derivatives, but for efficient portfolio management purposes only.

**Recommendation** The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### Concepts to understand

**Bonds** Securities that represent an obligation to repay a debt, with interest. Investment grade bonds are high quality bonds that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

**Derivative** A financial instrument whose price is dependent upon or derived from one or more underlying asset.

**Efficient Portfolio Management** An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

*You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.*

The following share classes are available for the Fund: Income A, Income M, Accumulation M, Income Z and Accumulation R. All share classes are subject to a minimum investment. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

### Risk and reward profile

Lower potential risk/reward Higher potential risk/reward  
The Fund is ranked in risk category 4 because its unit price has shown a medium level of volatility historically. As an investment, bonds are typically more volatile than money market instruments but less volatile than shares. Bonds issued by corporations are typically more volatile than bonds issued by governments. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee.

Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

**Concentration Risk** Funds which invest in a smaller number of securities can carry more risk than funds spread across a larger number of companies. To the extent that the Fund has exposure to an issuer, geographical area or type of security that is heavily affected by an event, either positive or negative, its value may rise or fall.

**Credit Risk** Issuers of certain fixed income securities could become unable to make income or capital payments on their debt. As such the value of a security will fall in the event of a rating downgrade or default of the issuer. In general fixed income securities that pay a higher level of income usually have a lower credit rating because of the increased risk of default.

**Interest Rate Risk** Fixed interest securities are particularly affected by trends in interest rates and inflation. If interest rates go up, the value of capital may fall, and vice versa. Inflation will also decrease the real value of capital.

**Liquidity Risk** In difficult market conditions the value of certain fund investments may be less predictable than normal. In some cases this may make such investments harder to sell at the last quoted market price, or at a price considered to be fair. Such conditions could result in unpredictable changes in the value of your holding.

*For more about fund risks, see the "Risk Factors" section in the Prospectus ([www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/](http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/))*

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

### One-off charges taken before or after you invest:

**Entry charge** 0.00%

**Exit charge** 0.00%

### Charges taken from the fund over a year:

**Ongoing charge** 0.43%

### Charges taken from the fund under specific conditions:

**Performance fee** none

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

For the entry and exit charges, if you are not eligible for this share class you will pay more than the amounts shown. Consult your financial adviser.

Ongoing charges figure is based on expenses for the year ending 31 October 2017. This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors.

For more about charges, see the expenses section in the full Prospectus and supplement ([www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/](http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance-Prices/))

## Past performance

The graph shows fund performance over the past 10 years where available. Past performance is no guarantee of future performance. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 8 February 1990 and the share class on 1 May 2012.

### The Royal London UK Government Bond Fund (Income - Class M Shares) in GBP

The Fund was initially launched as a unit trust but was converted to an open-ended investment company (OEIC) with effect from 30 April 2010.

Past performance is not a guide to future performance and may not be repeated. The value of investments may go down as well as up and you may not get back the amount you originally invested.

The chart shows performance in British pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance.

an Authorised Unit Trust of Schroder Unit Trusts Limited

### Class Z Accumulation GBP (GB00B76V8C37)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

## Objectives and Investment Policy

### Objectives

The fund aims to provide capital growth by investing in equities of European companies, excluding the UK.

### Investment Policy

The fund invests at least 80% of its assets in equities of large and mid sized European companies, excluding the UK. These are companies that, at the time of purchase, are considered to be in the top 90% by market capitalisation of the European equities market.

The fund may also invest in collective investment schemes and warrants, and hold cash.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

### Benchmark

This unit class is managed with reference to the FTSE World Series Europe ex UK TR GBP financial index. The manager invests on a discretionary basis and is not limited to investing in accordance with the composition of this benchmark.

### Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

### Distribution Policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

## Risk and Reward Profile

### The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

### Risk factors

The following risks may affect fund performance.

**Counterparty risk:** The counterparty to a derivative or other contractual agreement or synthetic financial product could become unable to honour its commitments to the fund, potentially creating a partial or total loss for the fund.

**Currency risk:** The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

**Derivatives risk:** A derivative may not perform as expected, and may create losses greater than the cost of the derivative.

**Equity risk:** Equity prices fluctuate daily, based on many factors including general, economic, industry or company news.

**Liquidity risk:** In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

**Operational risk:** Failures at service providers could lead to disruptions of fund operations or losses.
